# Welcome to Waimai.

## Welcome to Waimai's third annual ram sale, comprising 120 Romney and 40 CharaBlack Rams

2021 has become another year of uncertainties, and covid lockdowns, but hopefully you are all able to attend, in person, our third annual sale on 4th November. We are planning for the worst but hoping for the best, so will livestream our ram sale through the bidr sale platform. We will post some videos of selected lots pre-sale, so please take the time to look on the bidr web site.

As outlined in our 2021 Newsletter, it is exciting times for New Zealand's sheep farmers. Interest rates continue to be at historical lows while prices for both our lamb and mutton are at historical highs! AgriHQ Livestock Insight schedule prices for lamb, as of 1 October, are at \$9.55kg, which is 33% higher than the same period last year, with mutton 35% higher. These are exciting, unprecedented times which we need to enjoy, celebrate, and make the most of. As a banker once said to me, "it is important to celebrate one's victories in life, however big or small they might be, otherwise life becomes very mundane." It's not often you get words of wisdom from your banker!

I am really thrilled with this year's ram crop, who have come through the winter looking great. The Romney's are a very even line with heaps of meat and attitude and were bouncing out of the pens when Bougy and Cam were selecting them. I had to keep

reminding them that we are breeding hill country rams that need to be able to move.

We have a lot more WormFec Gold rams available this year which shows the genetic focus on worm resistance is coming through with 103 of our 120 Waimai Romney rams having a star ranking. We have done our second year of methane testing, with research eBv's being generated, and hopefully next year we will be able to offer low methane rams at our sale. It amazes me that so few ram breeders are willing to measure for methane, considering the issues farmers face, regarding GHG (greenhouse gases). I am hoping Waimai Romney can help solve problems rather than create them!

We have 40 CharaBlack rams on offer this year, with a lot of interest in them over the last few years. Farmers are enjoying the ease with which their progeny lamb, their vigour at birth and their fantastic growth rates. While we aren't being paid for it yet, I believe the CharaBlacks superior marbling in their meat, will one day make them a premium lamb carcase of the future.

We are once again selling a ram, Lot 60, for charity, with proceeds this year going to Rural Support Trust. We enjoy having you all here. Take care and enjoy the 4th year in the "Decade of the Sheep."

*Kind regards,  
Alastair, Ann & Helen*

# Conditions of Sale

## GST

All lots are sold exclusive of GST.

## Stud Ram Transfers

Romney and Chara Black Rams purchased for breeding operations, registered or unregistered will attract a minimum bid of \$5,000.

## Buyer Registration

A buyers number system will operate at the sale, therefore it will be necessary for all prospective purchasers to register prior to commencement of the sale.

## Conditions

This sale will be conducted under the usual conditions as set down by the New Zealand Stock and Station agents, a copy of which will be posted in the office.

## Disclaimer

While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions.

## Health & Safety

Visitors are reminded of health and safety regulations, and are requested to take all care and responsibility for all actions while on the property.

## Brucellosis Inspection

All rams have been manually examined by a vet and 15% of rams blood tested. Buyers are advised that although rams are free from brucellosis at time of sale, they may still get infected if mixed with diseased rams. We strongly recommend you annually blood test your existing ram team.

## Rebate

A 5% rebate is offered by PGG Wrightson's and NZ Farmers Livestock to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

## Selling Order

The vendor reserves the right to alter the order, replace or withdraw lots.

## Insurance

All care will be taken with the sheep awaiting delivery but they become the responsibility for the purchaser at the fall of the hammer. Therefore insurance is strongly advised and representations will be in attendance.

## Bidr®

We will also be using an online auction platform this year. Buy livestock on bidr® in 3 easy steps:

### 1.

Sign up at **bidr.co.nz** and add your agency account under account details

### 2.

Browse auctions to find livestock you are interested in buying

### 3.

Login and register for the real time online auction to bid for the livestock you wish to purchase

## Mission Statement

FeGold's goal is to produce a brand that protects the investment that sheep breeders have made into Facial Eczema (FE) while providing greater clarity to the ram buyer in regards to Facial Eczema genetics.

- There are 18 flocks across NZ who are FeGold accredited

## Ram Breeder Eligibility Criteria

- Testing with Sporidesmin at 0.60mg/kg
- At least 10 years of testing history
- 10% of sale rams tested for Facial Eczema tolerance
- All rams used are Ramguard tested

## Aim

To promote breeding for parasite resistance in the New Zealand sheep industry.

For a **FLOCK** to qualify for WormFEC Gold status, they must:

- Have been testing for at least 8 years
- FEC test at least 30% of all lambs weaned and/or 25 lambs per sire used
- Have an average flock DPF above 8, with an accuracy of at least 40%
- Be genetically connected for WormFEC

**There are 15 flocks across NZ who are WormFec Gold accredited.**

Once a flock has qualified for WormFEC Gold, an **INDIVIDUAL RAM** can qualify for different star ratings.

We have 407 Rams that qualify for a star rating as they are above the NZMW average of 1787, and have DPFs above the average of 8.

DPF over the 50th percentile (DPF 8-96), NZMW over 1912

DPF over the 40th percentile (DPF 96-191), NZMW over 1912

DPF over the 30th percentile (DPF 191-302), NZMW over 1912

DPF over the 20th percentile (DPF 302-455), NZMW over 1912

DPF over the 10th percentile (DPF >455), NZMW over 1912

# Explanations

## NZGE

New Zealand Genetic Evaluation.  
The national across flock, and across breed sheep evaluation that identifies the best rams for economic traits.

## NZMW

New Zealand Maternal Worth.  
An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth + adult size and wool production.

## DPG

Dual Purpose Lamb Growth. A function of 3BVs - pre-weaning growth, ewe milking ability and carcase weight.

## DPCR

Dual Purpose Caped Reproduction.  
The economic value of more lambs per litter, per year, per 2-Tooth and older ewes. Based on NLB BV (number of lambs born breeding value)

## DPA

Dual Purpose Adult Size. A function of an adult ewe lightweight BV.

## DPW

Dual Purpose Wool Production.  
A function of fleece weights.

## DPS

Dual Purpose Lamb Survival. A function of 2 PV's - lamb vigour (SUR) and ewe mothering.

Summary of Indexes NZGE 1 October 2020

	NZMW	DPG	DPCR	DPA	DPS	DPW
Average	1910	1406	307	-485	374	155

## DPX

A rating of an animal's ability to tolerate an FE challenge, based on the Ramguard system. The level of the challenge can differ between farm so this index is most accurate for comparisons **within** farm and birth year. Based on GGT21BV rankings within Waimai Romney will be given.

## Ramguard Facial Eczema Tolerance

Certificate of all tested rams will be shown at the ram sale indicating the level of testing, and the reaction if any, nil, slight, moderate or severe, for the rams tested that year.

## DPF

Dual Purpose Internal Parasite Resistance. Predicted from faecal egg count (FEC) using the Wormfec system. Based on 3 BV's FEC 1 & FEC 2 for lambs and AFEC for ewes. Individual rams will be given a star ranking if they qualify.

## SIL Technical Note

---

**NZ FARMERS LIVESTOCK**

*Working with Farmers for Farmers*

NZ Farmers Livestock are proud to be associated with Waimai Romney Stud - Reeves Family.

NZ Farmers Livestock is 100% owned and operated, and has a long standing, established history in the livestock market, networking and operating nationally for more than 100 years. We're committed to working with farmers and bringing you new technologies to keep you on top. Our recently updated app has been designed to customise and enhance your livestock trading experience. Our livestreaming offers you the ability to work directly with our livestock agents while viewing the livestream from your farm or office, without having to physically attend our sales.

For more information, visit [mylivestock.co.nz](http://mylivestock.co.nz) or contact us today.

# Facial Eczema

**Facial Eczema is much more than a production limiting disease. It is an animal welfare disease that should not occur in sheep.**

One of the most successful breeding programmes in the world to manage a disease began in New Zealand in 1973 when a group of sheep breeders set out to select sheep that were tolerant to Facial Eczema. From this selection rams were bred that carried the genes which enable sheep to tolerate being exposed to sporidesmin. This has resulted today in breeders being able to provide rams than not only carry these Facial Eczema protecting genes but also the genes that support high production.

It takes many many years to breed sheep that have a high level of tolerance to Facial Eczema. For commercial sheep breeders to fully capture the protection that these

genetics can provide the rams must come from breeders that are certified to have engaged in an intensive and prolonged selection programme. Such certification gives the assurance that the rams being sold carry those genes.

While there are other ways to minimise the impacts of Facial Eczema, none are totally effective and all have negative aspects to the them. To not use Facial Eczema tolerant rams in flocks that are likely to be exposed to that disease could be seen as an animal welfare transgression. To do so though is production enhancing.

# Chara Black Rams **40 lots**

A photograph showing several white Chara Black Rams in a grassy field. One ram is in the foreground, looking towards the camera. Another ram is partially visible behind it. The background is dark, making the white sheep stand out.

# Explanations

## Hampshire

The Hampshire breed arrived in New Zealand in 1861, and was developed in the county of Hampshire, through the crossing of Southdown rams with ewes of the Old Wiltshire Horn and the Berkshire Knot breeds. Today's New Zealand Hampshire has a black open face, with a fine shoulder, and a lean meaty carcase which is sweet and of top quality.

The Hampshire is famed for producing heavy, quality lambs, quickly. It has shown to convert grass into meat more efficiently than other breeds; and the more efficient the lamb, the greater the returns to the farmer. Meat scientist Dr Peter McGilchrist from the University of New England and Thomas Foods International tested hundreds of breeds of sheep for eating quality and found that the Hampshire produces consistently higher marbling than that of other breeds.

## Charollais

The Charollais sheep is a medium to large sized breed used as a terminal sire. It is long in the back, wedge shaped and well-muscled. A high frequency of the Myostatin gene mutation is responsible for the increased muscling observed in the Charollais breed. The breed is fine boned making for a high killing out percentage. The ease of lambing achieved due to their small head size and wedge shaped body means minimal stress to both ewe and lamb, and makes Charollais a perfect ram to go over hoggets.

One of the key benefits of using Charollais rams to produce commercial lambs is that they are fast to finish off grass and produce a carcase that is of good colour and marbled, adding more taste than other breeds that have less marbling.

## CharaBlack

As worldwide demand for greater food production and a change in diet to include quality, tasty, and nutritious red meat occurs, the CharaBlack is set to be an important player in this shift in production.

The CharaBlack's fast conversion of grass to a fantastic tasting protein is efficient and sustainable and can have an impressive impact on lamb meat production
