PLATINUM PARTNER

'For all your Farm Accounting Requirements'

Welcome to Waimai.

Welcome to Waimai's seventh annual ram sale, comprising 150 Romney and 48 CharaBlack Rams.

With the AgriHQ lamb indicator hovering around \$10.50/kg cwt through September 2025, and the New Season Outlook 2025/26 looking very positive, NZ sheep farmers have every reason to be optimistic about the coming season. Global demand for red meat is exceeding supply, with red meat prices at record highs. Demand for red meat is robust, particularly from the US, Europe, and the UK. Notably, lamb volumes to China and the US rose 23% and 17%, respectively, year-on-year. The average export price for lamb reached a new record in August at NZD 14.80/kg FOB, while mutton hit NZD 8.44/kg FOB - the highest level since May 2022. "It is interesting that the 15% tariff on lamb into the US doesn't appear to be impacting export volumes at this stage," according to Jen Cockran, Rabobank. "The real test may come in November and December as the cost filters through to consumers." It is really positive to see the sustained lift in volumes and higher values going into the UK and Europe, as free trade agreements signed over the last few years, take effect. A free trade deal with India, hopefully, isn't too far away, which will only increase demand for our wonderful NZ lamb.

The lift in wool prices over the last year is definitely a welcome boost for the industry and our farmers who produce this amazing

natural fibre. For the first time in years, demand for strong wool has surpassed the available supply, creating competitive pressure among buyers and seeing a lift in prices. "Significant global shortages of all wool types have prompted levels of demand at the Christchurch wool exchange not seen in a generation. Bidding at times was extreme, with buyers having to fill immediate orders into China," says David Burridge, PGG Wrightsons. Strong wool prices were up \$0.46 at the last SI sale in September, with the Strong Wool Indicator rising to \$4.30 clean. Industry efforts, including new product development and increased consumer awareness around the wonderful natural attributes of wool, are all helping to drive demand.

Improving the quality of your sheep flock increases its value and efficiency. One of the best ways to do this is by managing your flock's genetics. With over 80% of your flock's genetic progress contributed by the sire, it is important to pick the right sire to improve your flock's performance. We hope the combination of genetic traits we have available here at Waimai Romney & Waimai CharaBlack will help to improve the profitability of your flock. We appreciate you having a choice when it comes to selecting your genetics, and thank you for choosing Waimai Genetics.

***Kind regards,
Alastair, Ann, Helen & Tom***

Conditions of Sale

GST

All lots are sold exclusive of GST.

Stud Ram Transfers

Romney and Chara Black Rams purchased for breeding operations, registered or unregistered will attract a minimum bid of \$10,000.

Buyer Registration

A buyers number system will operate at the sale, therefore it will be necessary for all prospective purchasers to register prior to commencement of the sale.

Conditions

This sale will be conducted under the usual conditions as set down by the New Zealand Stock and Station agents, a copy of which will be posted in the office.

Disclaimer

While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions.

Health & Safety

Visitors are reminded of health and safety regulations, and are requested to take all care and responsibility for all actions while on the property.

Brucellosis Inspection

All rams have been manually examined by a vet and 15% of rams blood tested. Buyers are advised that although rams are free from brucellosis at time of sale, they may still get infected if mixed with diseased rams. We strongly recommend you annually blood test your existing ram team.

Rebate

A 5% rebate is offered by PGG Wrightson's and NZ Farmers Livestock to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

Selling Order

The vendor reserves the right to alter the order, replace or withdraw lots.

Insurance

All care will be taken with the sheep awaiting delivery but they become the responsibility for the purchaser at the fall of the hammer. Therefore insurance is strongly advised and representations will be in attendance.

Bidr®

We will also be using an online auction platform this year. Buy livestock on bidr® in 3 easy steps:

1.

Sign up at **bidr.co.nz** and add your agency account under account details

2.

Browse auctions to find livestock you are interested in buying

3.

Login and register for the real time online auction to bid for the livestock you wish to purchase

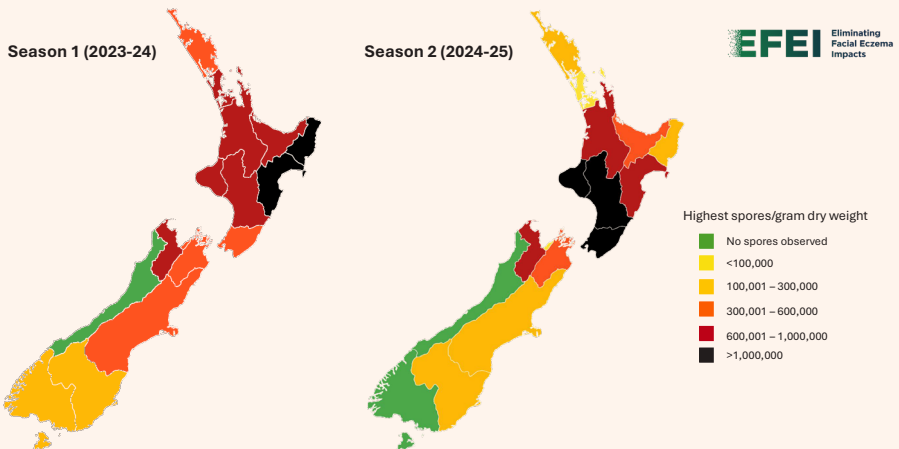

Mission Statement

FeGold's goal is to produce a brand that protects the investment that sheep breeders have made into Facial Eczema (FE) while providing greater clarity to the ram buyer in regards to Facial Eczema genetics.

- **There are 18 flocks across NZ who are FeGold accredited**

Ram Breeder Eligibility Criteria

- Testing with Sporidesmin at 0.60mg/kg
- At least 10 years of testing history
- 10% of sale rams tested for Facial Eczema tolerance
- All rams used are Ramguard tested

- Map is based on faecal FE spore counts from the B+LNZ sheep poo study
- Results are from 202 farms in Season 1 and 278 farms in Season 2
- Presence of spores indicates potential FE risk
- West Coast region – no spores were found in the 2 study farms tested, but the region has a history of FE

Aim

To promote breeding for parasite resistance in the New Zealand sheep industry.

For a **FLOCK** to qualify for WormFEC Gold status, they must:

- Have been testing for at least 8 years
- FEC test at least 30% of all lambs weaned and/or 25 lambs per sire used
- Have an average flock DPF above 109, with an accuracy of at least 40%
- Be genetically connected for WormFEC

There are 18 flocks across NZ who are WormFec Gold accredited.

Once a flock has qualified for WormFEC Gold, an **INDIVIDUAL RAM** can qualify for different star ratings.

As at August 2025, 383 Rams qualify for a star rating as they are above the NZMW+W average of 2308, and have DPFs above the average of 219.

DPF over the 50th percentile (DPF 219-339), NZMW+W over 2308

DPF over the 40th percentile (DPF 340-469), NZMW+W over 2308

DPF over the 30th percentile (DPF 470-620), NZMW+W over 2308

DPF over the 20th percentile (DPF 621-830), NZMW+W over 2308

DPF over the 10th percentile (DPF >831), NZMW+W over 2308

The Cool Sheep™ Methane Programme

“This ground-breaking project aims to give every sheep farmer in NZ the opportunity to use genetic selection to reduce greenhouse gas emissions from their sheep flock. The overarching goal is to offer every sheep farmer access to low methane genetics, and support them to be recognised and rewarded for breeding toward lower methane genetics.” Beef & Lamb Genetics.

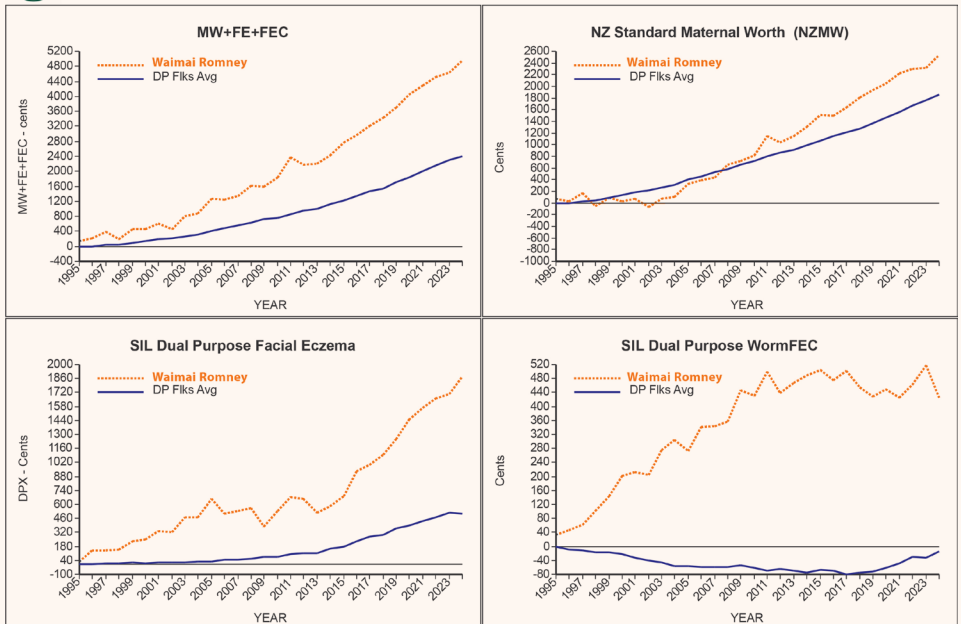

Lower values (more negative) for methane (CH₄) breeding values are better, indicating lower emissions per kilogram of feed eaten. BUT this needs to be balanced with the NZMW (New Zealand Maternal Worth) selection index as we still want to select animals with the production traits we require for our flocks.

2023 born Waimai Romney ewe lambs, with negative ebv's for methane, had 9% higher NZMW than the ewe lambs with positive methane.

WARNING — It is NOT VALID to use values in this table for rating animals on BVs or indexes generated from evaluations of other flock groups.

This table should ONLY be used with BVs and indexes from THIS NZGE evaluation, and not for NZGE evaluations on other dates (see date & SIL GE# at top of page).

Explanations

NZGE

New Zealand Genetic Evaluation. The national across flock, and across breed sheep evaluation that identifies the best rams for economic traits.

NZMW+W

New Zealand Maternal Worth and Wool. An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth + adult size and wool production.

DPG

Dual Purpose Lamb Growth. A function of 3BVs - pre-weaning growth, ewe milking ability and carcase weight.

DPCR

Dual Purpose Caped Reproduction. The economic value of more lambs per litter, per year, per 2-Tooth and older ewes. Based on NLB BV (number of lambs born breeding value).

DPA

Dual Purpose Adult Size. A function of an adult ewe lightweight BV.

DPW

Dual Purpose Wool Production. A function of fleece weights.

DPS

Dual Purpose Lamb Survival. A function of 2 PV's - lamb vigour (SUR) and ewe mothering.

Summary of Indexes NZGE September 2025

	NZMW+W	DPG	DPCR	DPA	DPS	DPW
Average	2318	1462	454	-493	586	84

DPX

A rating of an animal's ability to tolerate an FE challenge, based on the Ramguard system. The level of the challenge can differ between farm so this index is most accurate for comparisons **within** farm and birth year. Based on GGT21BV rankings within Waimai Romney will be given.

Ramguard Facial Eczema Tolerance

Certificate of all tested rams will be shown at the ram sale indicating the level of testing, and the reaction if any, nil, slight, moderate or severe, for the rams tested that year.

DPF

Dual Purpose Internal Parasite Resistance. Predicted from faecal egg count (FEC) using the Wormfec system. Based on 3 BV's FEC 1 & FEC 2 for lambs and AFEC for ewes. Individual rams will be given a star ranking if they qualify.

“

To not use Facial Eczema tolerant rams in flocks that are likely to be exposed to that disease could be seen as an animal welfare transgression. To do so though is production enhancing.

”

Genetics to Improve Eating Quality

“Terminal Sire Breeders involved in the Meat Quality Genomic Calibration Programme (SIGC) are leading the way using the latest genomic profiling tools to select top-performing rams. Selection on meat quality via the genomic test has been achieved while making faster genetic progress for other terminal traits, such as growth and survival,” says Jason Archer, B&LNZ Head of Genetics.

“If we can validate and incorporate these technologies in our Genetic selection, we are on the way towards improving eating quality in our sheepmeat faster than we are currently achieving.”

Eating quality is measured by AgResearch who measure marbling, shear force (a measure of tenderness),

meat colour and pH. The resulting data is fed into SIL and Waimai CharaBlack receives genomic Estimated Breeding Values (EBV's) for our flock which helps to improve the eating quality genetics of our flock.

Waimai CharaBlack continues to be one of the leading breeders of highly marbled, juicy, tender lamb, at the SIGC, with super sire Waimai CharaBlack 97/21 ranked 3rd, SIGC Meat Quality index, out of 154 rams.

Chara Black Rams

48 lots

WWT

Weaning weight
— adjusted for birth date

LW8

Liveweight at 8 months
— adjusted for birth date

EMA

Eye Muscle Area at the 12th rib,
at 8 months — adjusted for birth date

IMF

Intramuscular Fat — scanned at
8 months of age — range 1-5
