KIWIS FUELING KIWIS

Welcome to Waimai.

Welcome to Waimai's eighth annual ram sale, comprising 150 Romney and 48 Charablack Rams

With Sheep & Beef farmers profitability at historical highs, is it time for them to invest back into their businesses, to be more resilient when the next shock occurs? Fertiliser, repairs and maintenance, and plant replacements are always at front of mind, but what about Genetics? Maximising the genetic potential of livestock to convert pasture into high-value saleable product, efficiently, is one of the key pillars that separate top-performing livestock farmers from average operators. At Waimai Romney & CharaBlack Terminal, we believe we have those genetic traits, and it is your choice to use them.

At Waimai Romney, we have been selecting for eczema tolerance (FE Gold), worm resistance (WormFec Gold), and low dag score for many years, and they are now well embedded into our genetic program. We have been able to do this, while still having high production traits, which inevitably, are the traits that make sheep farmers money!! Our sires used in 2026 averaged 3461 NZMW which is in the top 10% for New Zealand Maternal Worth (NZMW), with our major focus on reproduction, growth, and survival. We regularly have animals in the top 5% in New Zealand for each of these genetic production traits. These traits have the greatest effect on a sheep breeder's profitability and once again we need to exercise our choice and use them

Eczema is moving down the country, with the whole of the North Island and a large part of the South Island now affected. Trevor Cook, (well-respected vet) believes, "not to use eczema genetics, while knowingly in an eczema area is an animal health transgression, but to do so is production enhancing." As farmers, we are responsible for the health of the livestock we care for. Eczema, like winter, is coming!!!

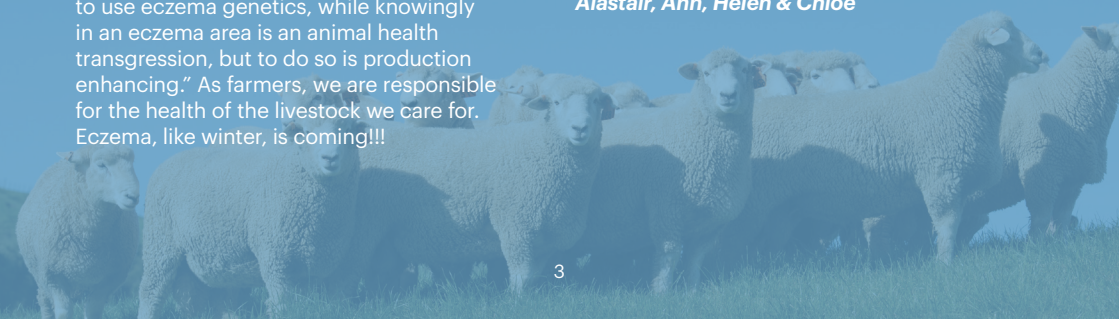

Drench failure is becoming a huge problem in New Zealand sheep operations. Selecting Worm-resistant genetics is one of the tools we can use to help mitigate this. Along with integrated stock policies, good feeding, crops, refugia, and strategic use of anthelmintics, they all play a part in helping to reduce drench resistance.

Sheep breeders are actively trying to find ways to minimise the "touch time" we have with our livestock, as invariably it takes time and costs money. Low dags and bare breeches are traits we can select for, which make a huge difference to the costs and workload on a farm. At Waimai Romney this year, ALL our 2025 born rams selected for stud use, have positive (good) figures for DPD, Dual Purpose Dags, which shows our genetics program, to produce Low Input genetics, is working.

Our Waimai CharaBlack terminals have been selected for carcass weight (growth and yield), as well as Meat Quality (IMF and Tenderness). It was very pleasing to have two of our sires (CB72/24 & CB738/24) progeny ranked, 1st and 3rd best sires for carcass weight and 4th & 6th best sires for tenderness at a recent Meat Quality progeny trial involving 46 terminal rams, while still achieving an average marble score. This is very pleasing as it validates our genetic decisions we have been making at Waimai CharaBlack.

At Waimai Romney we believe we have the right combination of genetics for the modern sheep farmer. Low Input. High Production!! Thank you for making the choice to choose Waimai Genetics.

***Kind regards,
Alastair, Ann, Helen & Chloe***

Conditions of Sale

GST

All lots are sold exclusive of GST.

Stud Ram Transfers

Romney and Chara Black Rams purchased for breeding operations, registered or unregistered will attract a minimum bid of \$10,000.

Buyer Registration

A buyers number system will operate at the sale, therefore it will be necessary for all prospective purchasers to register prior to commencement of the sale.

Conditions

This sale will be conducted under the usual conditions as set down by the New Zealand Stock and Station agents, a copy of which will be posted in the office.

Disclaimer

While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions.

Health & Safety

Visitors are reminded of health and safety regulations, and are requested to take all care and responsibility for all actions while on the property.

Brucellosis Inspection

All rams have been manually examined by a vet and 15% of rams blood tested. Buyers are advised that although rams are free from brucellosis at time of sale, they may still get infected if mixed with diseased rams. We strongly recommend you annually blood test your existing ram team.

Rebate

A 5% rebate is offered by PGG Wrightson's and NZ Farmers Livestock to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

Selling Order

The vendor reserves the right to alter the order, replace or withdraw lots.

Insurance

All care will be taken with the sheep awaiting delivery but they become the responsibility for the purchaser at the fall of the hammer. Therefore insurance is strongly advised and representations will be in attendance.

Bidr®

We will also be using an online auction platform this year. Buy livestock on bidr® in 3 easy steps:

1.

Sign up at **bidr.co.nz** and add your agency account under account details

2.

Browse auctions to find livestock you are interested in buying

3.

Login and register for the real time online auction to bid for the livestock you wish to purchase

Mission Statement

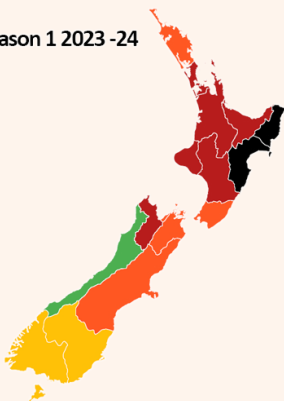

FeGold's goal is to produce a brand that protects the investment that sheep breeders have made into Facial Eczema (FE) while providing greater clarity to the ram buyer in regards to Facial Eczema genetics.

- **There are 18 flocks across NZ who are FeGold accredited**

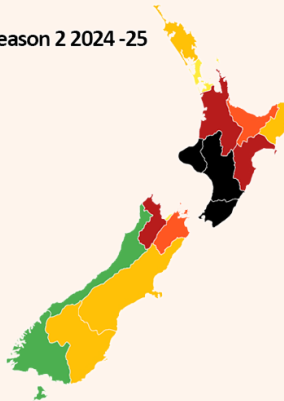

Ram Breeder Eligibility Criteria

- Testing with Sporidesmin at 0.60mg/kg
- At least 10 years of testing history
- 10% of sale rams tested for Facial Eczema tolerance
- All rams used are Ramguard tested

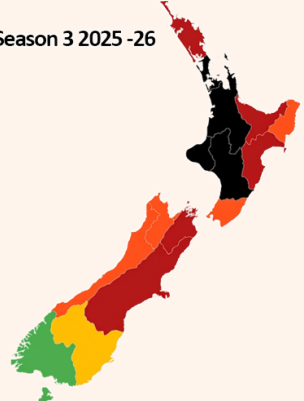

Season 1 2023 -24

Season 2 2024 -25

Season 3 2025 -26

- Map is based on faecal FE spore counts from the B+L NZ sheep poo study
- 10257 samples over three years
- Presence of spores indicates potential FE risk

EFEEI Eliminating Facial Eczema Impacts

Aim

To promote breeding for parasite resistance in the New Zealand sheep industry.

For a **FLOCK** to qualify for WormFEC Gold status, they must:

- Have been testing for at least 8 years
- FEC test at least 30% of all lambs weaned and/or 25 lambs per sire used
- Have an average flock DPF above 219, with an accuracy of at least 40%
- Be genetically connected for WormFEC

There are 18 flocks across NZ who are WormFec Gold accredited.

Once a flock has qualified for WormFEC Gold, an **INDIVIDUAL RAM** can qualify for different star ratings.

As at August 2026 , 415 Rams qualify for a star rating as they are above the NZMW average of 2695, and have DPFs above the average of 219.

DPF over the 50th percentile (DPF 219-350), NZMW+W over 2695

DPF over the 40th percentile (DPF 351-492), NZMW+W over 2695

DPF over the 30th percentile (DPF 493-658), NZMW+W over 2695

DPF over the 20th percentile (DPF 659-889), NZMW+W over 2695

DPF over the 10th percentile (DPF >890), NZMW+W over 2695

WARNING — It is NOT VALID to use values in this table for rating animals on BVs or indexes generated from evaluations of other flock groups.

This table should ONLY be used with BVs and indexes from THIS NZGE evaluation, and not for NZGE evaluations on other dates (see date & SIL GE# at top of page).

Explanations

NZGE

New Zealand Genetic Evaluation. The national across flock, and across breed sheep evaluation that identifies the best rams for economic traits.

NZMW+W

New Zealand Maternal Worth and Wool. An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth + adult size and wool production.

DPG

Dual Purpose Lamb Growth. A function of 3BVs - pre-weaning growth, ewe milking ability and carcase weight.

DPCR

Dual Purpose Caped Reproduction. The economic value of more lambs per litter, per year, per 2-Tooth and older ewes. Based on NLB BV (number of lambs born breeding value).

DPA

Dual Purpose Adult Size. A function of an adult ewe lightweight BV.

DPW

Dual Purpose Wool Production. A function of fleece weights.

CH4

Lower values (more negative for methane CH4) breeding values are better indicating lower emissions per kilogram of feed eaten.

DPS

Dual Purpose Lamb Survival. A function of 2 PV's - lamb vigour (SUR) and ewe mothering.

Summary of Indexes NZGE September 2026

	NZMW+W	DPG	DPCR	DPA	DPS	DPW
Average	2695	1511	461	-485	700	82

DPX

A rating of an animal's ability to tolerate an FE challenge, based on the Ramguard system. The level of the challenge can differ between farm so this index is most accurate for comparisons **within** farm and birth year. Based on GGT21BV rankings within Waimai Romney will be given.

Ramguard Facial Eczema Tolerance

Certificate of all tested rams will be shown at the ram sale indicating the level of testing, and the reaction if any, nil, slight, moderate or severe, for the rams tested that year.

DPF

Dual Purpose Internal Parasite Resistance. Predicted from faecal egg count (FEC) using the Wormfec system. Based on 3 BV's FEC 1 & FEC 2 for lambs and AFEC for ewes. Individual rams will be given a star ranking if they qualify.

“

To not use Facial Eczema tolerant rams in flocks that are likely to be exposed to that disease could be seen as an animal welfare transgression. To do so though is production enhancing.

”

Trevor Cook BVSc

Genetics to Improve Eating Quality

“Terminal Sire Breeders involved in the Meat Quality Genomic Calibration Programme (SIGC) are leading the way using the latest genomic profiling tools to select top-performing rams. Selection on meat quality via the genomic test has been achieved while making faster genetic progress for other terminal traits, such as growth and survival,” says Jason Archer, B&LNZ Head of Genetics.

“If we can validate and incorporate these technologies in our Genetic selection, we are on the way towards improving eating quality in our sheepmeat faster than we are currently achieving.”

Eating quality is measured by AgResearch who measure marbling, shear force (a measure of tenderness),

meat colour and pH. The resulting data is fed into SIL and Waimai CharaBlack receives genomic Estimated Breeding Values (EBV's) for our flock which helps to improve the eating quality genetics of our flock.

Waimai CharaBlack continues to be one of the leading breeders of highly marbled, juicy, tender lamb, at the SIGC, with super sire Waimai CharaBlack 97/21 ranked 3rd, SIGC Meat Quality index, out of 154 rams.
